

## Curriculum Vitae

### Key Qualifications

I have over 22 years of experience in the technical and contractual control and supervision of construction of major projects in Italy, Africa and Kazakhstan, Armenia and Albania, with special regard to F.I.D.I.C. and JCT contracts. Projects include: large dams/hydroelectric projects, highways, motorways and bridges (bolt bridge and Core-Ten Bridges), water supply and sewerage systems projects, land reclamation; Buildings includes Theater, Stadium, Skyscrapers,

Rehabilitations of Government's Buildings, Banks and Commercial Mall.

During more than 11 years of international experience, I had closely worked with international Consulting Firms and Contractors following the contract clauses implementation.

In particular, I'm skilled in the following fields of the infrastructural projects:

Coordination of several projects both on the Contractor's and the Engineer's side. Planning, budgeting, litigation, managing and coordination of human resources.

Planning, budgeting and costs control with particular regard to the control of actual spending pattern with the respect of project forecast.

Delay & disruption related advisory services to the Construction and engineering sectors. I lead a small team of planners and delay analysts focused on claims, delay analysis and planning, consultancy advice relating to claims and disputes arising from construction and engineering project delays and disruptions, project scheduling issues.

Negotiation both from the Employers and the Contractor side of possible variations of works and relevant changes in costs and possible consequent litigation.

Design activities management with particular regard to the coordination of different designers involved in the design of the works up to the detailing step.

Contract management, cost control, cross-checking budget-closing, etc., planning and managing plant requirements and subcontractors.
